I DON'T GIVE A CRAP IF YOU HAVE A HALL OF FAME BUST,
IF YOU'RE A PRO BOWLER OR WIN 20 SUPER BOWLS.

**AT THE END OF THE DAY,
YOU'RE ALL GONNA DIE.**

RAMS' ANDREW WHITWORTH ON LOSING THE SUPER BOWL

Character creation

"Who are you, ya twat" - Some British twat

Everyone starts with 60 points to spend on character creation.

Attributes*

Rolling Attributes

Roll 4d6, get rid of the lowest dice.

If two ones, re-roll one before eliminating the lowest dice.

Can spend 5 points to add 1 Attribute point. Max 28

Strength: This attribute will affect your character's ability to do strength related tasks, such as additional damage with melee weapons and other feats involving strength.

Dexterity: This attribute will affect your character's ability to do actions related to being agile, fast, or sneaky. It will modify your initiative roll, and also helps with avoiding hits from weapons.

Constitution: This attribute will affect your character's overall hit points and any rolls that may affect your overall well being. Great for elemental save DCs.

Mind: This attribute will affect your character's ability to think and reason. Used for science, medical, knowledge, moral checks. Affects Sanity for psychers.

Charisma: This attribute will affect your character's ability to communicate with other characters. Outside of RP, some artifacts will be affected by Charisma mod.

Ability score modifier

1-3 = -3

4-6 = -2

7-8 = -1

9-11 = 0

12-13 = 1

14-16 = 2

17-20 = 3

21-23 = 4

24-27 = 5

27-28 = 6

Non rolling attributes *

Stamina: used for getting things done quickly or running at a really good pace: add Constitution and strength multipliers together and add 6.

When stamina reaches half -2 to hit, athletics, and dodge checks.

When stamina reaches zero the character is too exhausted or incapacitated/knocked out and must rest, thus can not move.

Mental Health: Used to keep track of characters' sanity. Start stat: Mind mod plus Charisma mod plus 3.

When zero character is unusable. Anything below character dies or goes insane. Psychers use Mental Health to cast psychic abilities.

Hit Ability: 10+Dodge. Might seem low, but hit shaving can add to your hit ability.

Health*

Health: everyone starts at 5 plus constitution stat and max of your dice.

1d4 4 points

1d6 6 points

1d8 8 points

1d10 12 points

1d12 15 Points

Combat Skills

Training in skills can be bought with ability points in the next section, which will help settle your starting combat skill stat.

Shooting skill: add training, dexterity mod, equipment bonuses

Melee skill: training, equipment bonuses, strength mod

Hexen skill: training, mind mod, equipment bonuses

Combat Training*

"Shit this one can actually shoot, The Bearded one almost shot me!"

-Hans

You will need to add the points cost from the previous level of said area's training. For example, to get heavy weapons would be (15) plus the (10) from the medium training in total (25) points. With the exception of the exo training in that it is a separate cost from the rest.

Melee training

- Basic: You know how to actually physically hit people with weapons. **1 point**, 1 to melee skill.
- Advanced: You are properly competent and can now use weapons with elements now. **5 points**, 1 to melee skill.
- Expert: Proper fedora tipping. Can use elegant melee. **10 points**, 2 to melee skill.

Gun training

- Light weapons (pistols) **1 point**, 1 to shooting skill
- Medium weapons (rifles, shotguns ect) **10 points**, 1 to shooting skill
- Heavy weapons (flame throwers, shoulder fired rockets, heavy rifle) **15 points**, 2 to shooting skill.

Hexen training *must have a Mind at a minimum of 13*

- Basic Hexen training (use of 2 artifacts) **5 points**, 1 point to hexen skill.
- Advanced Hexen training (use of up to 6 artifacts) **10 points**, 1 point to hexen skill.
- Expert Hexen training (use of up to 12 artifacts) **15 points**, 2 to hexen skill.

Psykers powers gain the ability to manipulate reality with your mind. **30 points**. Add +3 to mind, -2 to Strength, -1 to constitution, -1 dex. Campaign must be set at the earliest in the year 2021.

Armour training

- Light armor: no cost
- Medium: 5 points

-Heavy: 10 points

-Exo training: 10 points (requires AIT or someone to teach characters to use exos. Gained as a perk not from leveling up.)

Saving throws and Natural Armour.

"Athena what do you put into your body on your free time to survive that poison"- Rhine Hart

Mental (mind modifier)

Dodge (dexterity modifier)

Fortitude (Constitution modifier)

Natural Armour is Toughness 1. I mean you can try to survive without armour. Enough sessions w/out armour and participation in combat and you'll get a perk.

Non Combat skills and abilities.*

Cost: +1 point for every added skill point (2->3 = 3 points)excluding modifier.

Max skill points is current level plus 9

-Knowledge (mind)

-Zone knowledge (mind)

-Medical (mind) (adds to success roll not actual healing)

-Perception (mind)

-Artifact hunting (mind)

-Athletics (strength)(ex: throwing, lifting, pushing, pulling, etc.,)

-Intimidation (Physical = str) (Voice = Char)

-Thievery/pickpocket (dex)

-Stealth (dex)

-Driving car (dex) (Needs one skill point in order to not have disadvantage)

-Piloting (dex) (Needs one skill point in order to not have disadvantage)

-Driving military vehicles(dex)

-Boating/Sailing (dex) (Needs one skill point in order to not have disadvantage)

-Negotiation (charisma)

-Deception (charisma)

-Electronics (mind) (Needs one skill point in order to not have

disadvantage)

-Profession/craft (DMs discretion as to profession/craft and its modifier.)

-Personal Relations (Charisma)

for checks skill point plus attribute modifier.

Items

"Did you hear about that guy who managed to curve a bullet?"

-Mina "Kyras" Van Helsing

BASE STARTING CASH: \$2000 (\$50 SAVED AFTER CHARACTER CREATION)

Light Armour

Flak jacket - (\$80) toughness +3.

Light Vest - (\$120) toughness +2, can be hidden beneath clothing.

Medium Armour

Kevlar Vest (soft) - (\$500) toughness +4.

Kevlar vest (Hard) - (\$800) toughness +5, -1 to dodge, and athletic. -1/6 speed (round up)

None combat skills reductions -1 to dexterity skills.
protects user from most melee with the exception to the chain sword.

Heavy

Full Kevlar soft - (\$2000) Toughness +7. -2 to dodge. -1/4 speed (round up). Disadvantage to dexterity skills except military vehicles. Ignores failed wound stamina damage.

can be worn by those with medium Armour training but also suffer a minus 2 to None combat skills if they don't have heavy Armour training.

Full Kevlar metal - (\$5000) Toughness +8. -2 to dodge. -1/2 speed (round up). -1 to damage taken. Ignores failed wound stamina damage. Disadvantage to dexterity skills.

protects the user from most melee with the exception to the chain sword.

Exo

"They are charging us with two full squads of exos! chain swords out and suppressing fire!"

- Phexios

WARNING: EXO TRAINING AND NEURAL LINK REQUIRED.

Exo Armor (medium/artifact) (\$10000): toughness +7, -3 damage taken. -2 dodge. immune to most melee, and 5 artifacts.

Exo Armor (heavy/artifact) (\$11000): toughness +8, -3 damage taken. -3 to dodge rolls. immune to most melee. Disadvantage to dex skills.

Light Weapons

RPM = Rounds Per Magazine. +1 and greater weapons are not purchasable, but can be upgraded to be so via gunsmithing.
Semi Auto Pistols (8rpm): 1d4. Strength 3. Semi Auto. (\$150)

Auto/Semi Pistols (15rpm): 1d4. strength 3. Auto, Semi auto. (\$175)

SMG (20rpm): 1d4+1. Strength 3. Auto, Semi-auto. (\$200)

Revolvers (6 rounds per cylinder): 1d10. -1 to hit. Strength 5. Semi double lever action. (\$350)

Light Weapons (stock)

SMG Stock (30rpm): 1d4+1. Strength 3. Auto, Semi-auto. (\$220)

Medium Weapons

Military Rifle (30rpm): 1d8. Strength 6. Auto, Burst, Semi auto.
DMR series (12RPM): allows Semi-auto and concentration. (\$600)

Civilian Rifle (10rpm): 1d6 -1 to hit. Strength 4. Semi. (\$400)

Shotguns (flechette) (6rpm semi, 10rpm auto/semi): 3d4 feet within 15 feet Strength 6, 1d4 past 15feet. Strength 4. Semi (Can find auto/semi versions). (\$500-1000) *The Semi version is not magazine fed. Rather, it is the amount a magazine would hold for inventory management

Shotguns (Slug) (6rpm semi, 10rpm auto/semi): 1d8 -1 to hit, Strength 7, Semi (Can find auto/semi versions) (\$500 semi, \$1000 auto) *The Semi version is not magazine fed. Rather, it is the amount a magazine would hold for inventory management

Anti-Tank Rifle (1rpm): 1d10. 1D10+6 to Vehicles. Strength 8. -1 toughness to vehicles.

Heavy Weapons

Flame thrower (5 uses/tank): 4d4. Strength 5. Can inflict element heat. (\$950)

Flame thrower attachment (10 uses/tank) (Heavy Exo Suit): 4d4. Strength 6. Can inflict element heat (Fortitude save. dc=10 + hexen skill). (\$1200)

Heavy rifle (6rpm): 1d10. Strength 9. -2 defender toughness. 5 stamina damage, must use the Concentrate action to aim or suffer -5 to hit. -2 of enemy's hit ability on hit roll = 1d4 damage. Semi, Concentrate. (\$3k)

Light Machine Gun (90rpm): 1d8. -1 to hit. Strength 7. 2 stamina damage. has the ability to suppress targets without party members(45 ammo spent). Auto, Burst. (\$1.6k)

Shoulder fired rockets (1rpm): 2d10, 3d4 10 foot diameter, 2d10+10 to directly hit vehicles, 3d4+5 10 foot diameter to vehicles. Strength 10. -2 toughness to vehicles. 5 stamina damage. Semi. (\$2K)

Rigging

" Ha, you think you can head into the zone without anything to carry and or put your equipment on kid, what is this some RPG game" - Bryan Paignon

Back pack (\$50)

Heavy Tactical rigging: 1 heavy, 1 medium, 1 pistol, 4 grenades, radio, 6 mags of choice. (\$200)

Heavy Artifact rigging: (can't be worn with exo Armor) up to 6 artifacts, 1 Light Weapon, 2 mags (\$400)

Light Tactical rigging: 1 medium, 2 light/1 stock light, radio, 2 grenades, 4 mags of choice. (\$100)

Technicians rigging: 1 Light, 2 mags, radio, Tools Kit, hacking device.

Light Artifact rigging 3 artifacts(1 pistol or primary) 2 mags (\$150)

Satchel: medical supplies or other items that need quick access (\$30)

Ammo and Mags

Pistol/SMG rounds (\$5)

Revolver rounds (\$6)

Medium Rifle Rounds (\$4)

Shoulder fired rockets (\$100)

Flamethrower tanks (filled) (\$90)

Light Machine gun belt rounds (\$11)

Shotguns (\$5)

Heavy rifle rounds (\$50)

Energy Rounds (\$20)

Cylinder (\$5)

Cylinder full (\$10)

base mag (\$9) add 4 more dollars for every five more bullets in chamber

Misc Adventuring Items and Gear

-Short frequency radio (\$45)

-Long frequency radio (\$125)

-Encrypted radio long range only (\$300)

-State Map (\$10)

-Artifact finder (\$80)

-Hazard mask: -3 to hit. (\$90)

-Experts Hazard mask: -1 to hit built in radio (\$550)

-Ghillie Suit Basic: -1 opponents perception, -1 opponents to hit. Can not be worn in exos or heavy armour. (\$60)

-Ghillie Suit: -2 opponents perception, -2 opponents to hit. Can not be worn of exos or heavy armour. (\$150)

-Stealth Suit: -3 opponents perception when moving slow, -4 when not moving. (\$1250)

-MRE's (\$5)

-Tent (\$100)

-Fire starter (\$25)

-Canteen (\$10)

-GPS (useless in the zone) (\$150)

-compass (\$20)

-Night vision goggles: negates to hit and to find penalties in no light situations. (\$200)

-Flashlight 30ft (\$5)

- Flashlight 200ft (\$30)
- Welding tool (\$180)
- Artifact container (\$60)
- Biofoam 2d4 health plus medical skill. can't stabilize downed people. (\$70)
- Medkits: Can stabilize downed people. Dc 9 med skill check if not skilled in medical -2 to roll. (\$80)
- Binoculars (\$25)
- Range finder used by spotter (\$80)

Artifacts

" There are literally hundreds of different kinds and we keep discovering new ones practically every day." - Dr. Ibrahim Schertz

It is up to the DM to decide what it does, what are the benefits and downsides, charge duration, and the amount of damage it deals or is paid for in blood, if any. Usable only once per turn or every 5 seconds unless stated otherwise in artifact description.

They also need special containers to be able to use them.

Couple of examples:

Crystal artifact +4 to stamina and stamina checks, -1 to overall protection. Charge: 5 seconds. (Uncommon)

Green Burner: through a process can turn into a bio foam that helps heal and close wounds. Charge: Immediate. (Rare)

Spike: Minus -2 to enemy chance to hit you -1 to hit. Charge: 5 seconds (Uncommon)

Red burner: 1d6 heat damage. Charge: 5 Seconds. (Common)

Blue Sphere: 1d6 cold. Charge: 5 seconds. (common)

Asort: 90 degree arc all targets must make a dodge save dc 10 or take 4d4 damage, 2 turn rounds to recharge. Charge: 10 seconds. (Rare)

Blue burner: AOE of 5 feet, all allied units heal 2d4. Single use. Charge: 5 seconds. (Common)

Taser stone: Lethal - 1d4 electrician damage. Non-lethal - Electric element attack to stun. Charge: 5 seconds. (Common)
(Uncommon: Lethal - 1D6, non-lethal - stunned 2 rounds)

Black stone: dc 11 chance to cause opponents to fear -1 to all skill checks and save checks forever until the Black Stone is destroyed. On a natural 20 opponents suffer 3 mental health damage and flee. On a natural one the Black Stone whispers in eldritch language to user, user flinches and falls to the ground for one round and suffers 4 mental health. Can negate psych abilities. Charge: 30 seconds. (Myth)

Elements

"No one is quite sure as to how weapons can shoot out different kinds of elements and I don't care helps me kill stuff faster"-
Unknown ass hole zone hunter

-All elements do 1d4 of extra damage (can include more d4 at DM's decision. Don't ask for more.)

-To avoid an element status, roll a Fortitude save.

-DC=10 + hexen skill for element status.

Electricity: If failed, stunned for next round. Can stun Electronics and Vehicles for an advantage at electronics skill.

Heat: Target takes burn damage. Target catches on fire, losing 1 stamina and burn damage per turn until snuffed (DC 6). +2 dc every time burn damage is inflicted.

Cold: target must roll a dex check. dc (10) or suffer -1 to all actions.

Blood damage: target must make a Constitution check of dc (13) or lose 1 point of health 1d4/ round after turn of infliction.

Poison: Target must wait 3 turns in order to lose poison. 1d4/round. Loses 1 stamina/round.

Leveling

"I know you veterans have been waiting for this" - Alexander House

For every level a character levels up one level: 6 points to spend on what they please. They also roll for health using the health die they bought.

Every even number level the character advances to adds 2 to mental health

Every odd number level the character advances to adds 2 stamina points.

Gain a Perk every odd level. First one is up to the player. After level 1, DM discretion based on character actions.

Psyker Leveling

Every Odd number level the character adds 1 to mental health.

Perks

Perks are a little something extra a dm can hand out to players outside of them leveling. It could be the team did something extraordinary like get out of an ambush without getting hit, Someone curving a bullet, making 3 stamina checks in a row with natural twenties.

A few examples,
Strike from the shadow: plus 1 to hit when ambushing, melee is always a crit if hit.

Thick skin plus: +1 to natural armour.

Smooth talker: +1 to Charisma skills (Including Intimidate).

Psychic Powers

Roll 2d6 and equal or over what the requirement is. double ones power fails and the Psyker is dealt 3 damage. Double sixes power is still successfully casted but the Psyker is dealt 3 damage. Should a Psyker die as a result of a double roll in a 15 foot radius everyone caught in it suffers 2d6 damage. If the target is in part cover caster must subtract

CR = Cast Requirement.

Level 1 Powers

Passive (gain immediately and does not count for psyche slot):
Thoughtful touch -Can hear the thoughts of anyone you're currently touching skin to skin.

Bolt CR6- 1d4 damage. Double six rolls damage is changed to 1d6

plus 1. Range: 40ft

Speed CR4- can cast on self or someone else. Hastens the person's reaction time and how fast they run. Power instills a +2 bonus to hit shave instead of +1 when the person runs. +1 to dex checks. Range: 5ft

Strength CR6- can cast on self or someone else. Power instills plus 3 to strength. plus 2 to melee damage. Range: 5ft

Flame ball CR5- 1d4 fire damage. Range: 30ft

Lighting Zap CR5- 1d4 electricity damage. Range: 30ft

Reload CR3- Free reload for self or other. Either free mag reload or free mag fill. Range: 10ft.

Trip CR6- Make someone trip when they run. Effectively exposing the target to eliminate hit shave. Range: 40ft. Type: Reaction.

WTF? CR6- Make target brain dead stupid (not brain dead) for duration of ability. Unaware of anything that happens. Drains half a mental health/turn or every 5 seconds. No re-roll for extending duration. Range: 5ft.

Level 2 powers (More to Come)

Passive gain: Mind Relief- Can not lose mental health except by another psycher.

Sting CR6- Poison effect on target.

Mental barrier CR6- 15ft circle vicinity gains the mental relief passive. Lasts 5 minutes.

Rubber CR4- take half damage when inflicted by damage of any kind. Resist electricity element. Range: 5ft. Duration: 2 turns/ 10 seconds.

Beginner Shroud CR5- Generate a mind image of a human like creature or smaller with an optional practical effect. Sound effect, and item. Can not harm or move outside of 5ft range where ability was casted. Only a visual being, not a physical. Range: 30ft. Duration: 2 turns or 10 seconds.

Level 3 powers (More to Come)

Killer Queen CR7- 5ft explosion. 1d6. 1d8 to vehicles. Range: touch to set. Infinite for trigger.

Nio CR9- Halves the speed of time for everyone except the user. Double dexterity and perception skill. Gain an extra turn in combat. Lasts 1 turn or 5 seconds in game time. Range: Self.

If Sonic was a Cross Country Runner CR8- Infinite Stamina for 10 minutes. Range: 5ft. Charge time: 30 seconds.

TV Lounge CR6- Generate a fake brick wall that only allows targets and self can enter. Forms a cognitive TV Lounge for party members to enter. The TV Lounge can move, but only if no physical beings are currently in the TV Lounge, and the re-rolled CR is met. Only 1 moveable TV Lounge per user. Range: Touch. Duration: Toggled.

Combat

-ONE TURN IS 5 SECONDS IN GAME

Surprise Attacks

-Available outside of "Engaged Combat" when one of the following facts is true:

- 1) Attacking/Shooting while hidden.
- 2) Attacking/Shooting outside of NPC or Player perception.
- 3) Weapons are hidden (unless unarmed. Unarmed is instead referenced to "Surprise Attack, fact 4)."
- 4) NPC or Player is unaware of aggression (ex: dinner table conversation, it's going well. Then a hitman pulls out a silenced gun out of nowhere, and he shoots the woman at the head of the table who had her own gun ready on her lap.)
- 5) Trap is triggered.
- 6) Artifact/Ability/Feat override

-Can be synchronized.

Insta-Kills

- Only available in "**Surprise Attacks.**"
- The "**Concentration**" select fire option must be in effect for guns to insta-kill.
- Ignore "**To Wound**" if a concentrated shot hits the target.
- Melee insta-kills use the "**Melee (Combat)**" rules for hitting and blocking (melee skill is not added for blocker. Only dex and D20). If a critical hit, the target is insta-killed. If hit, but not a critical, deal normal damage.
- Note: Not exactly all NPC's are acceptable to Insta-Kills.
- PC's can not be insta-killed. Only critically hit/damaged.

Pre-Engaged Combat and Initiative

- Surprise attacks go first before initiative. Initiative ignored if the target(s) is critically shot/killed during the surprise attack and no enemy witnesses are present.
- Initiative: 1d20 plus dex modifier. Tie goes to higher current stamina. Tie goes to roll off. Crits always are first and get a bonus pre-round, though order is determined by the added dex-mod first before the tie rules. Crit fails are last and can not shoot/attack the first turn.

Select Fire

- All weapons come with a select fire list. The list will inform you as to what that weapon can use. *LMGs have a special select fire rule set. Noted on the Heavy Weapon: LMG section.
 - Enabling a select fire is a free action.
 - If you use less bullets than the required amount for a select fire, cancel any select fire bonus.
 - Select Fire list:
- CONCENTRATION: Take one turn to concentrate in combat. Allows the user to aim at body parts for a critical or insta-kill hit. 1 Round/Use
- SEMI: No modifiers. A single shot at the target. 1 Round/Use
- SEMI AUTO: +1 to hit. 3 Round/Use.
- BURST: +1 strength. 9 Rounds/use.

AUTO: +1 to hit, +1 strength. Ignores the running hit shave. 12 rounds/use.

To Hit (Ranged)

-1D20 plus skill and/or perk. Must beat or tie opponent's hit ability.

-Hit Shaving: dex mod + cover bonus? + Ran? + equipment bonus?

-Rolls of 20+, including modifiers, are Critical Hits. Failed wound rolls are instead successful. Enables "*Critical Wound*"

To Wound

-Roll 1d10

-Crit fails never wound.

-Wound Chart:

strength twice the toughness? DC 2

Is it greater? DC 4

Is it equal? DC 6

Lower than? DC 8

Double lower? DC 10

-If you hit but fail to wound, the opponent takes 0.5 stamina damage. No Weapon modifiers, except for suppression.

-Critical Wound: Either two rolled 10's in a row on wounding, or a successful wound roll after a "*Critical Hit*." Roll one more damage dice for your weapon you used to achieve the wound.

Melee (Initiation)

-Melee is engaged within a 5 foot radius if chosen to engage in melee.

-Ranged weapon fire is unusable in melee (Unless a Perk is given)

-Roll a separate initiative roll for melee. Initiative is D20+Melee skill. A melee turn will happen when a melee combatant's turn in the regular initiative order is up.

-If a combat encounter starts in melee, the regular initiative

roll is initiated after the first melee initiative.

-A new melee initiative is rolled at the beginning of the next melee turn in the Initiative order for the chosen combatants.

-If separate melee encounters are in effect at the same time, each encounter rolls their own melee initiatives. Still follows the regular initiative order.

Charging

-This is an Action, unless said otherwise.

-Charge Distance: $\frac{1}{2}$ of movement speed, rounded up.

-Requires 1 stamina point. None are expended.

-Charge Roll: 1D20+Melee Skill. DC: 10

-Failed Charge: Opponent receives a free "hit," "skip," or "disengage" action on the charger.

-Charge allows the charger to only choose the "Hit" melee action, ignoring the first melee initiative.

Melee (Combat)

-During a combatant's turn in melee initiative, they must choose either 1) "skip", 2) "hit" or 4) "Disengage."

-3) blocking" happens automatically when being hit.

1) Skip: Do nothing. Prepare for your next block.

2) Hitting: Roll D20 + Strength modifier + Melee skill. Must beat the target's block. Lose 0.3 Stamina.

To Guard Break: If hit roll is double the amount of the block

roll (unless block roll >8), or a block is a critical failure, get a free critical wound. Negate lost stamina for the hit.

- 3) Blocking: Roll D20 + Dex modifier + Melee skill. If block beats to hit, Lose 0.1 Stamina if successful.

To Parry: If the block roll is double the amount of the hit roll (unless hit roll >8), or the hit roll is a critical failure, get a free hit on the combatant. Negate lost stamina for block and free hit.

- 4) Disengage: 1 Action. Other combatants receive a free hit or skip action of their choice. Can not Parry. Melee combat is then over between the combatants. (If disengaging a charge, the charger does not receive a free hit action).

Bleed Out

When health reaches zero the character is down. They are unconscious and bleeding out. If more negative HP than half of your total HP, then outright dead.

-Characters must make a base D20 bleed out check every round they are not stabilised (dc 12).

-4 fails until they have fully bleed out to death.

-3 successes until natural stabilization.

-Stabilization returns the combatant to 1HP, and is considered unconscious and prone.

-Any hit taken while bleeding out adds 1 to the fail counter. Guns must still shoot normally, but melee hits are free if within 5ft and with only a melee weapon. Deals half of the

damage that would be rolled for these hits.
